Recent Advances in Mining and Processing of Low-Grade and Submarginal Mineral Deposits: Centre for Natural Resources, Energy and Transport, United Nations, New York Yong Zhou

Recent Advances in Mining and Processing of Low-Grade and Submarginal Mineral Deposits reviews advances in the mining and processing of low-grade and submarginal mineral deposits, taking into account the environmental considerations that increasingly are being regarded as a necessary prerequisite to acceptable mineral resources development. The focus is on marginal and sub-marginal ores, as well as ores of above normal cut-off grades which for some reason cannot be mined and/or processed economically at current technological or economic levels.

This book is comprised of 12 chapters and begins with an overview of low-grade ore potential, followed by a discussion on the theoretical and practical aspects of in situ mining. Block cave-in place leaching, biological leaching of sulfide ores, and nuclear chemical mining of primary copper sulfides are also considered.

Subsequent chapters explore the economics and safety of nuclear chemical copper mining; hydrometallurgy of low-grade copper ores; trends in process metallurgy; and environmental aspects of mining and processing low-grade and submarginal mineral deposits.

This monograph should be of interest to mining officials and professionals.

From reader reviews:

Greg Wilson:

Have you spare time for any day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book eligible Recent Advances in Mining and Processing of Low-Grade and Submarginal Mineral Deposits: Centre for Natural Resources, Energy and Transport, United Nations, New York? Maybe it is being best activity for you. You recognize beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have various other opinion?

Nicole Oneal:

As people who live in the particular modest era should be revise about what going on or info even knowledge to make all of them keep up with the era which can be always change and make progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for you personally but the problems coming to you is you don't know which you should start with. This Recent Advances in Mining and Processing of Low-Grade and Submarginal Mineral Deposits: Centre for Natural Resources, Energy and Transport, United Nations, New York is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

Cherry Simard:

Are you kind of busy person, only have 10 or perhaps 15 minute in your day to upgrading your mind expertise or thinking skill actually analytical thinking? Then you have problem with the book than can satisfy your small amount of time to read it because this all time you only find reserve that need more time to be read. Recent Advances in Mining and Processing of Low-Grade and Submarginal Mineral Deposits: Centre for Natural Resources, Energy and Transport, United Nations, New York can be your answer because it can be read by a person who have those short spare time problems.

Evelyn Rogers:

You are able to spend your free time to read this book this reserve. This Recent Advances in Mining and Processing of Low-Grade and Submarginal Mineral Deposits: Centre for Natural Resources, Energy and Transport, United Nations, New York is simple bringing you can read it in the park your car, in the beach, train in addition to soon. If you did not have got much space to bring the particular printed book, you can buy the e-book. It is make you easier to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.
