**The Neolithic Revolution (The First Humans and Early Civilizations)** Susan Meyer

The dawn of the Neolithic Era ushered in major changes in the way people lived. In fact, these changes were so sweeping that the transition from the Mesolithic Era to the Neolithic Era is referred to as the Neolithic Revolution. The beginnings of agriculture and the domestication of animals both date from this period. These changes to the food supply led people to settle in permanent communities, which, in turn, led to organized societies and social hierarchy. This book examines the factors that could have led to this revolution and the archaeological evidence of which changes happened where and when.
