Getting Started with Polymer Arshak Khachatryan

Explore the whole new world of web development and create responsive web apps using Polymer

About This Book

- Get to grips with the principles of Material Design and Google Web components
- Make full use of the Polymer Designer Tool, Polymer Starter Kit, and Dart to create responsive web apps
- An in-depth guide with real-life examples so you can learn everything you need to know about Polymer

Who This Book Is For

If you are a beginner-level web developer who would like to learn the concepts of web development using the Polymer library, then this is the book for you. Knowledge of JavaScript and HTML is expected.

What You Will Learn

- Understand the basics of web components such as Shadow DOM, HTML imports, Templates, and custom elements
- Familiarize yourself with the principles of Material Design
- Install Polymer on your system and create your project structure
- Use the different Polymer 1.0 elements in your code
- Work with Polymer.dart and create your own app
- Get to know the best practices in Polymer programming from the top guys in the Polymer team

In Detail

Polymer is a library that helps you develop fast, responsive applications for the desktop and mobile web. It uses the Web Components specifications for the components and Material Design concepts to create a beautiful user interface.

This focused, fast-paced guide deals with Polymer web components. We will cover layouts, attributes, elements, and handling touch and gesture events. You will also see how to build custom web components and applications using Polymer. Don't want to code? You can make the most of the Polymer Designer Tool app and create your own app without coding at all. Finally, you will see how you can improve your Polymer application by reading the best practices from Google Polymer team.

By the end of this book, you will be equipped with all the necessary skills to use Polymer to create custom web components.

From reader reviews:

Marion Richey:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each guide has different aim as well as goal; it means that publication has different type. Some people truly feel enjoy to spend their time to read a book. They are reading whatever they take because their hobby is reading a book. What about the person who don't like reading a book? Sometime, particular person feel need book after they found difficult problem or exercise. Well, probably you will want this Getting Started with Polymer.

Cassandra Sanderson:

What do you in relation to book? It is not important with you? Or just adding material when you want something to explain what your own problem? How about your extra time? Or are you busy particular person? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They must answer that question simply because just their can do which. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this kind of Getting Started with Polymer to read.

Jason Nimmons:

The reserve untitled Getting Started with Polymer is the reserve that recommended to you to study. You can see the quality of the publication content that will be shown to anyone. The language that author use to explained their ideas are easily to understand. The author was did a lot of exploration when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also will get the e-book of Getting Started with Polymer from the publisher to make you much more enjoy free time.

Zandra Woods:

This Getting Started with Polymer is great reserve for you because the content which can be full of information for you who all always deal with world and get to make decision every minute. That book reveal it data accurately using great organize word or we can claim no rambling sentences included. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with wonderful delivering sentences. Having Getting Started with Polymer in your hand like having the world in your arm, info in it is not ridiculous just one. We can say that no e-book that offer you world throughout ten or fifteen moment right but this publication already do that. So , this is good reading book. Hey Mr. and Mrs. active do you still doubt which?
