Advanced Signal Processing on Brain Event-Related Potentials: Filtering ERPs in Time, Frequency and Space Domains Sequentially and Simultaneously Fengyu Cong, Tapani Ristaniemi, Heikki Lyytinen

This book is devoted to the application of advanced signal processing on event-related potentials (ERPs) in the context of electroencephalography (EEG) for the cognitive neuroscience. ERPs are usually produced through averaging single-trials of preprocessed EEG, and then, the interpretation of underlying brain activities is based on the ordinarily averaged EEG. We find that randomly fluctuating activities and artifacts can still present in the averaged EEG data, and that constant brain activities over single trials can overlap with each other in time, frequency and spatial domains. Therefore, before interpretation, it will be beneficial to further separate the averaged EEG into individual brain activities. The book proposes systematic approaches pre-process wavelet transform (WT), independent component analysis (ICA), and nonnegative tensor factorization (NTF) to filter averaged EEG in time, frequency and space domains to sequentially and simultaneously obtain the pure ERP of interest. Software of the proposed approaches will be open-accessed.

From reader reviews:

German Montoya:

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each publication has different aim or goal; it means that e-book has different type. Some people experience enjoy to spend their time for you to read a book. They are reading whatever they consider because their hobby is actually reading a book. Think about the person who don't like studying a book? Sometime, individual feel need book after they found difficult problem as well as exercise. Well, probably you will require this Advanced Signal Processing on Brain Event-Related Potentials:Filtering ERPs in Time, Frequency and Space Domains Sequentially and Simultaneously.

Ida Hamilton:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their free time with their family, or all their friends. Usually they undertaking activity like watching television, gonna beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Can be reading a book can be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to try look for book, may be the book untitled Advanced Signal Processing on Brain Event-Related Potentials:Filtering ERPs in Time, Frequency and Space Domains Sequentially and Simultaneously can be excellent book to read. May be it might be best activity to you.

Nathanael Ma:

Reading can called brain hangout, why? Because when you find yourself reading a book especially book entitled Advanced Signal Processing on Brain Event-Related Potentials:Filtering ERPs in Time, Frequency and Space Domains Sequentially and Simultaneously your head will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely might be your mind friends. Imaging every word written in a book then become one application form conclusion and explanation this maybe you never get previous to. The Advanced Signal Processing on Brain Event-Related Potentials:Filtering ERPs in Time, Frequency and Space Domains Sequentially and Simultaneously giving you a different experience more than blown away your thoughts but also giving you useful info for your better life in this era. So now let us present to you the relaxing pattern here is your body and mind will probably be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Clifford Caldwell:

Reading a book for being new life style in this 12 months; every people loves to study a book. When you go through a book you can get a lot of benefit. When you read guides, you can improve your knowledge, simply

because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you wish to get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, as well as soon. The Advanced Signal Processing on Brain Event-Related Potentials:Filtering ERPs in Time, Frequency and Space Domains Sequentially and Simultaneously will give you a new experience in reading a book.
