Exploration and Engineering (New Series in NASA History)

Erik M. Conway

Exploration and Engineering (New Series in NASA History) Erik M. Conway

Although the Jet Propulsion Laboratory in Pasadena, California, has become synonymous with the United States' planetary exploration during the past half century, its most recent focus has been on Mars. Beginning in the 1990s and continuing through the Mars Phoenix mission of 2007, JPL led the way in engineering an impressive, rapidly evolving succession of Mars orbiters and landers, including roving robotic vehicles whose successful deployment onto the Martian surface posed some of the most complicated technical problems in space flight history.

In *Exploration and Engineering*, Erik M. Conway reveals how JPL engineers' creative technological feats led to major Mars exploration breakthroughs. He takes readers into the heart of the lab's problem-solving approach and management structure, where talented scientists grappled with technical challenges while also coping, not always successfully, with funding shortfalls, unrealistic schedules, and managerial turmoil.

Conway, JPL's historian, offers an insider's perspective into the changing goals of Mars exploration, the ways in which sophisticated computer simulations drove the design process, and the remarkable evolution of landing technologies over a thirty-year period.

From reader reviews:

Richard Graham:

Nowadays reading books become more than want or need but also turn into a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want have more knowledge just go with knowledge books but if you want really feel happy read one using theme for entertaining including comic or novel. Often the Exploration and Engineering (New Series in NASA History) is kind of reserve which is giving the reader unstable experience.

Dina Hirsch:

This book untitled Exploration and Engineering (New Series in NASA History) to be one of several books that will best seller in this year, here is because when you read this guide you can get a lot of benefit in it. You will easily to buy this kind of book in the book shop or you can order it through online. The publisher of the book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Mobile phone. So there is no reason for your requirements to past this e-book from your list.

James Shockley:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't determine book by its cover may doesn't work the following is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer could be Exploration and Engineering (New Series in NASA History) why because the excellent cover that make you consider with regards to the content will not disappoint you. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.

Anna Hart:

Some people said that they feel bored when they reading a publication. They are directly felt the idea when they get a half elements of the book. You can choose the particular book Exploration and Engineering (New Series in NASA History) to make your own personal reading is interesting. Your personal skill of reading expertise is developing when you similar to reading. Try to choose very simple book to make you enjoy to study it and mingle the idea about book and examining especially. It is to be very first opinion for you to like to available a book and learn it. Beside that the reserve Exploration and Engineering (New Series in NASA History) can to be your brand-new friend when you're feel alone and confuse using what must you're doing of the time.
