## **Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining** Ronald Eisler

Despite the esteemed nature of gold in society, evidence of adverse ecotoxicological effects and risk to human health in various mining and extraction techniques has generated increasing interest in the biological and environmental implications of gold. *Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining* is the first comprehensive book to evaluate the effect of gold production and use on human health as well as the environmental impact of gold mining and extraction.

Dr. Ronald Eisler, a well-known senior research biologist and expert in the chemical and biological effects of various compounds on wildlife, provides a thorough risk assessment of gold, including its geology and sources and physical, chemical, and metabolic properties. The author documents gold concentrations and field collections of abiotic materials and biota and presents research on the lethal and sublethal effects of gold on plants and animals. Supported by case histories, the book examines health risks in gold miners, human sensitivity to jewelry and dental implants, and medicinal uses. It uses examples in several countries to thoroughly explore the environmental effects of gold extraction, including tailings disposal, acid mine drainage, cyanide, arsenic, and mercury contamination, water management issues, and abandoned mines.

Unlike traditional risk assessments, the author also takes into account social, political, economic, medicinal, and psychological variables for a more complete perspective on gold's impact on health and the environment. *Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining* concludes with a discussion on mining legislation, safety, and procedures.

### **From reader reviews:**

#### **Rafael Brooks:**

Book is written, printed, or highlighted for everything. You can know everything you want by a publication. Book has a different type. As you may know that book is important thing to bring us around the world. Alongside that you can your reading proficiency was fluently. A publication Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining will make you to possibly be smarter. You can feel more confidence if you can know about anything. But some of you think in which open or reading some sort of book make you bored. It is far from make you fun. Why they might be thought like that? Have you trying to find best book or appropriate book with you?

#### **Larry Mason:**

That e-book can make you to feel relax. This particular book Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining was multi-colored and of course has pictures on the website. As we know that book Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining has many kinds or style. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that.

#### **Alexandra Robbins:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person such as reading or as studying become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your teacher or lecturer. You find good news or update concerning something by book. Different categories of books that can you choose to use be your object. One of them is actually Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining.

#### **Robert Journey:**

Some people said that they feel bored when they reading a publication. They are directly felt it when they get a half portions of the book. You can choose often the book Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining to make your own reading is interesting. Your own personal skill of reading proficiency is developing when you including reading. Try to choose easy book to make you enjoy to learn it and mingle the sensation about book and reading through especially. It is to be initial opinion for you to like to open up a book and study it. Beside that the e-book Biogeochemical, Health, and Ecotoxicological Perspectives on Gold and Gold Mining can to be your friend when you're experience alone and confuse with the information must you're doing of this time.
