Boundless

Biology Boundless

The Boundless Biology textbook is a college-level, introductory textbook that covers the intriguing subject of Biology, the study of life. Boundless works with subject matter experts to select the best open educational resources available on the web, review the content for quality, and create introductory, college-level textbooks designed to meet the study needs of university students.

This textbook covers:

The Study of Life -- The Science of Biology, Themes and Concepts of Biology

The Chemical Foundation of Life -- Atoms, Isotopes, Ions, and Molecules: The Building Blocks; Water; Carbon

Biological Macromolecules -- Synthesis of Biological Macromolecules, Carbohydrates, Lipids, Proteins, Nucleic Acids

Cell Structure -- Studying Cells, Prokaryotic Cells, Eukaryotic Cells, The Endomembrane System and Proteins, The Cytoskeleton, Connections between Cells and Cellular Activities

Structure and Function of Plasma Membranes -- Components and Structure, Passive Transport, Active Transport, Bulk Transport

Metabolism -- Energy and Metabolism; Potential, Kinetic, Free, and Activation Energy; The Laws of Thermodynamics; ATP: Adenosine Triphosphate; Enzymes

Cellular Respiration -- Energy in Living Systems, Glycolysis, Oxidation of Pyruvate and the Citric Acid Cycle, Oxidative Phosphorylation, Metabolism without Oxygen, Connections of Carbohydrate, Protein, and Lipid Metabolic Pathways, Regulation of Cellular Respiration

Photosynthesis -- Overview of Photosynthesis, The Light-Dependent Reactions of Photosynthesis, Using Light Energy to Make Organic Molecules

Cell Communication -- Signaling Molecules and Cellular Receptors, Propagation of the Signal, Response to the Signal, Signaling in Single-Celled Organisms

Cell Reproduction -- Cell Division, The Cell Cycle, Control of the Cell Cycle, Cancer and the Cell Cycle, Prokaryotic Cell Division

Meiosis and Sexual Reproduction -- The Process of Meiosis, Sexual Reproduction

Mendel's Experiments and Heredity -- Mendel's Experiments and the Laws of Probability, Characteristics and Traits, Laws of Inheritance

Modern Understandings of Inheritance -- Chromosomal Theory and Genetic Linkage, Chromosomal

Basis of Inherited Disorders

DNA Structure and Function -- Historical Basis of Modern Understanding, DNA Structure and Sequencing, Basics of DNA Replication, DNA Replication in Prokaryotes, DNA Replication in Eukaryotes, DNA Repair

Genes and Proteins -- Introduction, The Genetic Code, Prokaryotic Transcription, Eukaryotic Transcription, RNA Processing in Eukaryotes, Ribosomes and Protein Synthesis

Gene Expression -- Regulation of Gene Expression, Prokaryotic Gene Regulation, Eukaryotic Transcription Gene Regulation, Eukaryotic Epigenetic Gene Regulation, Eukaryotic Post-transcriptional Gene Regulation, Eukaryotic Translational and Post-translational Gene, Development on the Cellular Level, Cancer and Gene Regulation

The following chapters are also included:

Biotechnology and Genomics

Evolution and the Origin of Species

The Evolution of Populations

Phylogenies and the History of Life

Viruses

Prokaryotes: Bacteria and Archaea

Protists

Fungi

Seedless Plants

Seed Plants

Introduction to Animal Diversity

Invertebrates

Vertebrates

Plant Form and Physiology

Soil and Plant Nutrition

Plant Reproduction

The Animal Body: Basic Form and Function

Animal Nutrition and the Digestive System

The Nervous System

Sensory Systems and Movement

The Endocrine System

The Musculoskeletal System

The Respiratory System

The Circulatory System

Osmotic Regulation and Excretion

The Immune System

Animal Reproduction and Development

Ecology and the Biosphere

Population and Community Ecology

Ecosystems

From reader reviews:

Olive Wilson:

The book Biology can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book Biology? A few of you have a different opinion about reserve. But one aim that book can give many facts for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or data that you take for that, you could give for each other; you could share all of these. Book Biology has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open and read a reserve. So it is very wonderful.

Elizabeth Jamerson:

Information is provisions for anyone to get better life, information nowadays can get by anyone on everywhere. The information can be a understanding or any news even a huge concern. What people must be consider if those information which is from the former life are difficult to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen within you if you take Biology as the daily resource information.

Gregory McCormick:

Are you kind of stressful person, only have 10 as well as 15 minute in your time to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are having problem with the book when compared with can satisfy your short period of time to read it because this time you only find book that need more time to be read. Biology can be your answer given it can be read by you actually who have those short spare time problems.

Robert Clark:

Reading a book to get new life style in this season; every people loves to go through a book. When you examine a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself read a fiction books, this kind of us novel, comics, as well as soon. The Biology will give you new experience in examining a book.
