*Martha L. Abell, James P. Braselton*

## **Differential Equations with Maple V®** Martha L. Abell, James P. Braselton

Differential Equations with Maple V provides an introduction and discussion of topics typically covered in an undergraduate course in ordinary differential equations as well as some supplementary topics such as Laplace transforms, Fourier series, and partial differential equations. It also illustrates how Maple V is used to enhance the study of differential equations not only by eliminating the computational difficulties, but also by overcoming the visual limitations associated with the solutions of differential equations.

The book contains chapters that present differential equations and illustrate how Maple V can be used to solve some typical problems. The text covers topics on differential equations such as first-order ordinary differential equations, higher order differential equations, power series solutions of ordinary differential equations, the Laplace Transform, systems of ordinary differential equations, and Fourier Series and applications to partial differential equations. Applications of these topics are also provided.

Engineers, computer scientists, physical scientists, mathematicians, business professionals, and students will find the book useful.

### **From reader reviews:**

#### **Francis Dawson:**

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a walk, shopping, or went to often the Mall. How about open or read a book titled Differential Equations with Maple V®? Maybe it is to be best activity for you. You realize beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have other opinion?

#### **Kevin Vargas:**

Book will be written, printed, or highlighted for everything. You can know everything you want by a reserve. Book has a different type. As we know that book is important thing to bring us around the world. Next to that you can your reading skill was fluently. A book Differential Equations with Maple V® will make you to become smarter. You can feel much more confidence if you can know about everything. But some of you think that will open or reading some sort of book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or suitable book with you?

#### **Richard Dutton:**

The book untitled Differential Equations with Maple V® contain a lot of information on the item. The writer explains the girl idea with easy way. The language is very easy to understand all the people, so do not really worry, you can easy to read that. The book was written by famous author. The author brings you in the new period of literary works. It is possible to read this book because you can continue reading your smart phone, or product, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can available their official web-site and order it. Have a nice learn.

#### **Jeffrey Baptiste:**

You can spend your free time to learn this book this book. This Differential Equations with Maple V® is simple to create you can read it in the park, in the beach, train along with soon. If you did not get much space to bring the actual printed book, you can buy the actual e-book. It is make you quicker to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
