EPMESC VII: International Conference on Enhancement and Promotion of Computational Methods in Engineering and Science, 2-5 August 1999, Macao

The first EPMESC Conference took place in 1985. It was during the Conference, recognising the success it had been, that the promoters decided to organise other EPMESC conferences, giving birth to a new series of international meetings devoted to computational methods in engineering.

The variety of subjects covered by the papers submitted to the 7th Conference demonstrates how much computational methods expanded and became richer in their applications to Science and Technology. New paradigms are being cultivated as non-numerical applications started to compete with the more traditional numerical ones. The scientific and technological communities to which the EPMESC Conferences used to be addressed themselves have changed.

The two-volume Proceedings that we achieved to gather represent many of the interesting developments that are taking place, not only in the Asia Pacific Region, but also in some other scientifically advanced parts of the World, and cover a vast list of subjects grouped under the following headings: Applied Mathematics; Physics and Materials Science; Solid Mechanics; Finite Element and Boundary Element Methods; Structural Analysis; Structural Dynamics and Earthquake Engineering; Structural Engineering; Reinforced Concrete; Knowledge-Based Systems; Artificial Neural Networks and Genetic Algorithms; Computer-Aided Instruction; Computer-Aided Design and Computer-Aided Engineering; Geographic Information Systems; Environmental Applications; Road Engineering; Geotechnics; Soil Mechanics; Fluid Mechanics and Hydraulics.

Two hundred and fifty one summaries were accepted, many of them with comments and restrictions, by the Programme Committee.

From these, 153 papers resulted, many of them from Portuguese and Chinese origin, that were submitted to the revision of an international panel of referees from Australia, Belgium, Brazil, China, Italy, Macao, Portugal, Switzerland, United Kingdom and United States, to which we gladly acknowledge our gratitude and appreciation.

From reader reviews:

Ann Tuttle:

Book is written, printed, or illustrated for everything. You can understand everything you want by a guide. Book has a different type. As we know that book is important issue to bring us around the world. Adjacent to that you can your reading talent was fluently. A publication EPMESC VII: International Conference on Enhancement and Promotion of Computational Methods in Engineering and Science, 2-5 August 1999, Macao will make you to always be smarter. You can feel far more confidence if you can know about every little thing. But some of you think which open or reading some sort of book make you bored. It is far from make you fun. Why they may be thought like that? Have you trying to find best book or acceptable book with you?

Dora Vazquez:

What do you think about book? It is just for students because they are still students or it for all people in the world, exactly what the best subject for that? Merely you can be answered for that question above. Every person has different personality and hobby for every single other. Don't to be compelled someone or something that they don't want do that. You must know how great along with important the book EPMESC VII: International Conference on Enhancement and Promotion of Computational Methods in Engineering and Science, 2-5 August 1999, Macao. All type of book would you see on many methods. You can look for the internet methods or other social media.

Gary Clark:

Information is provisions for people to get better life, information presently can get by anyone with everywhere. The information can be a know-how or any news even restricted. What people must be consider if those information which is inside the former life are challenging to be find than now's taking seriously which one works to believe or which one typically the resource are convinced. If you obtain the unstable resource then you buy it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take EPMESC VII: International Conference on Enhancement and Promotion of Computational Methods in Engineering and Science, 2-5 August 1999, Macao as your daily resource information.

Betty Brown:

The particular book EPMESC VII: International Conference on Enhancement and Promotion of Computational Methods in Engineering and Science, 2-5 August 1999, Macao will bring you to definitely the new experience of reading a new book. The author style to explain the idea is very unique. When you try to find new book to learn, this book very suitable to you. The book EPMESC VII: International Conference on Enhancement and Promotion of Computational Methods in Engineering and Science, 2-5 August 1999, Macao is much recommended to you to study. You can also get the e-book from your official web site, so

you can quicker to read the book.
