Logic and Structured Design for Computer Programmers

Harold J. Rood

Logic and Structured Design for Computer Programmers Harold J. Rood
LOGIC AND STRUCTURED DESIGN is an introduction to the logic of data processing. It is intended for those who plan, but have not yet begun, to study programming, particularly those with little background in mathematics or logic. The author avoids reference to specific programming languages, isolating questions of logic from questions of syntax. This approach enables readers to concentrate on the logic of problems. The book walks readers through logical problems common to a variety of programming languages and provides the background in logic that many programming texts and courses assume.
