# Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics)

*Pasquale Maddaloni, Marco Bellini, Paolo De Natale*

**Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics)** Pasquale Maddaloni, Marco Bellini, Paolo De Natale

*Foreword by Nobel laureate Professor Theodor W. Hänsch of Ludwig-Maximilians-Universität München*

Based on the authors' experimental work over the last 25 years, **Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook** presents basic concepts, state-of-the-art applications, and future trends in optical, atomic, and molecular physics. It provides all the background information on the main kinds of laser sources and techniques, offers a detailed account of the most recent results obtained for time- and frequency-domain applications of lasers, and develops the theoretical framework necessary for understanding the experimental applications.

After a historical introduction, the book describes the basic concepts and mathematical tools required for studying the physics of oscillators. It then discusses microwave and optical resonators, crucial aspects of operation and fundamental properties of lasers, and precision spectroscopy and absolute frequency metrology. It also focuses on microwave and optical frequency standards and explores current and potential research directions.

Accessible to scientists, postdoc researchers, and advanced undergraduate students, this self-contained book gives a wide-ranging, balanced overview of the areas—including frequency standards and clocks, ultra-high-precision spectroscopy, quantum information, and environmental metrology—revolutionized by the recent advent of optical frequency comb synthesizers (OFCs) based on femtosecond mode-locked lasers. The book is also a useful guide to cutting-edge research for manufacturers of advanced laser systems and optical devices.

**From reader reviews:**

**Patricia French:**

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite guide and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics). Try to make the book Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) as your close friend. It means that it can to get your friend when you feel alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you considerably more confidence because you can know every thing by the book. So , let us make new experience as well as knowledge with this book.

**Daniel Engle:**

Reading a guide can be one of a lot of pastime that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new facts. When you read a publication you will get new information simply because book is one of many ways to share the information as well as their idea. Second, studying a book will make you actually more imaginative. When you examining a book especially fiction book the author will bring someone to imagine the story how the personas do it anything. Third, you may share your knowledge to other people. When you read this Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics), you are able to tells your family, friends and soon about yours reserve. Your knowledge can inspire the others, make them reading a reserve.

**Debra Espiritu:**

Within this era which is the greater man or woman or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple way to have that. What you are related is just spending your time almost no but quite enough to experience a look at some books. One of several books in the top listing in your reading list is definitely Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics). This book which is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking way up and review this publication you can get many advantages.

**Crystal Lavigne:**

Guide is one of source of understanding. We can add our know-how from it. Not only for students but in addition native or citizen require book to know the change information of year to help year. As we know those books have many advantages. Beside all of us add our knowledge, may also bring us to around the

world. From the book Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics) we can take more advantage. Don't you to definitely be creative people? Being creative person must choose to read a book. Merely choose the best book that ideal with your aim. Don't always be doubt to change your life at this book Laser-Based Measurements for Time and Frequency Domain Applications: A Handbook (Series in Optics and Optoelectronics). You can more appealing than now.
