Mathematical Linguistics (Advanced Information and Knowledge Processing)

Andras Kornai

Mathematical Linguistics (Advanced Information and Knowledge Processing) Andras Kornai

Mathematical Linguistics introduces the mathematical foundations of linguistics to computer scientists, engineers, and mathematicians interested in natural language processing. The book presents linguistics as a cumulative body of knowledge from the ground up: no prior knowledge of linguistics is assumed.

Previous textbooks in this area concentrate on syntax and semantics - this comprehensive volume covers an extremely rich array of topics also including phonology and morphology, probabilistic approaches, complexity, learnability, and the analysis of speech and handwriting.

As the first textbook of its kind, this book is useful for those in information science (information retrieval and extraction, search engines) and in natural language technologies (speech recognition, optical character recognition, HCI). Exercises suitable for the advanced reader are included, as well as suggestions for further reading and an extensive bibliography.

From reader reviews:

Thomas Barreto:

The book Mathematical Linguistics (Advanced Information and Knowledge Processing) will bring you to definitely the new experience of reading any book. The author style to elucidate the idea is very unique. When you try to find new book you just read, this book very suitable to you. The book Mathematical Linguistics (Advanced Information and Knowledge Processing) is much recommended to you you just read. You can also get the e-book in the official web site, so you can more readily to read the book.

Ramiro Alvarez:

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Might be reading a book might be option to fill your no cost time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the publication untitled Mathematical Linguistics (Advanced Information and Knowledge Processing) can be good book to read. May be it is usually best activity to you.

Eric Freeman:

Your reading sixth sense will not betray a person, why because this Mathematical Linguistics (Advanced Information and Knowledge Processing) e-book written by well-known writer we are excited for well how to make book that may be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and producing skill only for eliminate your own hunger then you still uncertainty Mathematical Linguistics (Advanced Information and Knowledge Processing) as good book not only by the cover but also from the content. This is one reserve that can break don't determine book by its protect, so do you still needing a different sixth sense to pick this specific!? Oh come on your reading sixth sense already told you so why you have to listening to one more sixth sense.

Edward White:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book was rare? Why so many query for the book? But any people feel that they enjoy with regard to reading. Some people likes studying, not only science book but also novel and Mathematical Linguistics (Advanced Information and Knowledge Processing) or even others sources were given expertise for you. After you know how the good a book, you feel want to read more and more. Science e-book was created for teacher or even students especially. Those publications are helping them to put their knowledge. In various other case, beside science e-book, any other book likes Mathematical Linguistics (Advanced Information and Knowledge Processing) to make your spare time more colorful. Many types of book like this one.
