Melatonin in Psychiatric and Neoplastic Disorders Mohammad Shaffi

Provides psychiatrists, oncologists, endocrinologists, pediatricians, and other health professionals with a thorough examination of the most current research on the role of melatonin in psychiatric and neoplastic disorders. This unique textbook and clinical reference is divided into four sections: - Evolutionary Development and Neurobiology of the Pineal Gland -- discusses the synthesis of melatonin and the anatomy of the pineal gland- Melatonin in Psychiatric Disorders in Adults -- pioneers in the field of pineology outline their findings on melatonin in the areas of adult depression, sleep disorders, chronobiological mood disorders, bipolar disorders, eating disorders, panic disorders, shift work maladaptation, and jet lag. - Melatonin in Children and Adolescents -- examines the pineal gland and melatonin in healthy children and adolescents and reviews recent studies on serum and urine melatonin in major depression- Melatonin and Neoplastic Disorders -- examines melatonin's potential as an antioxidant in cancer cells and its diagnostic and therapeutic value in oncology

The final chapter looks at the role that mindful meditation plays in increasing nocturnal serum melatonin and examines meditation's potential as an adjunct treatment for breast, prostate, and gastrointestinal tract cancers or as a preventive measure for high-risk individuals.

With the expert knowledge and current research presented in Melatonin in Psychiatric and Neoplastic Disorders, clinicians can provide accurate information to their patients on melatonin's role in health and disease.
