Biodiversity Conservation and Poverty Alleviation: Exploring the Evidence for a Link (Conservation Science and Practice)

Biodiversity Conservation and Poverty Alleviation: Exploring the Evidence for a Link (Conservation Science and Practice)

Biodiversity conservation and poverty alleviation are both important societal goals demanding increasing international attention. While they may seem to be unrelated, the international policy frameworks that guide action to address them make an explicit assumption that conserving biodiversity will help to tackle global poverty. Part of the *Conservation Science and Practice Series* published with the Zoological Society of London, this book explores the validity of that assumption. The book addresses a number of critical questions:

- Which aspects of biodiversity are of value to the poor?
- Does the relationship between biodiversity and poverty differ according to particular ecological conditions?
- How do different conservation interventions vary in their poverty impacts?
- How do distributional and institutional issues affect the poverty impacts of interventions?
- How do broader issues such as climate change and the global economic system affect the biodiversity – poverty relationship at different scales?

This volume will be of interest to policy-makers, practitioners and researchers concerned with understanding the potential - and limitations - of integrated approaches to biodiversity conservation and poverty alleviation.

From reader reviews:

Juan Harrell:

What do you concentrate on book? It is just for students since they are still students or the idea for all people in the world, exactly what the best subject for that? Just you can be answered for that question above. Every person has different personality and hobby per other. Don't to be pressured someone or something that they don't wish do that. You must know how great along with important the book Biodiversity Conservation and Poverty Alleviation: Exploring the Evidence for a Link (Conservation Science and Practice). All type of book would you see on many sources. You can look for the internet resources or other social media.

Christopher Hill:

Is it you who having spare time then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Biodiversity Conservation and Poverty Alleviation: Exploring the Evidence for a Link (Conservation Science and Practice) can be the reply, oh how comes? It's a book you know. You are and so out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these textbooks have than the others?

Mary Quinn:

As a university student exactly feel bored in order to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Biodiversity Conservation and Poverty Alleviation: Exploring the Evidence for a Link (Conservation Science and Practice) can make you truly feel more interested to read.

Ronald Griffin:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from the book. Book is created or printed or outlined from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just seeking the Biodiversity Conservation and Poverty Alleviation: Exploring the Evidence for a Link (Conservation Science and Practice) when you essential it?
