Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems

Alfredo Macias, Francisco Uribe, Enrique Diaz

The FIRST MEXICAN MEETING ON MATHEMATICAL AND EXPERIMENTAL PHYSICS was held at EL COLEGIO NACIONAL in Mexico City, Mexico, from September 10 to 14, 2001. This event consisted of the LEOPOLDO GARCIA-COLIN SCHERER Medal Lecture, delivered by Prof. Nicholas G. van Kampen, a series of plenary talks by Leopoldo Garcia-Colin, Giinter Nimtz, Luis F. Rodriguez, Ruoon Barrera, and Donald Saari, and of three parallel symposia, namely, Cosmology and Gravitation, Statistical Physics and Beyond, and Hydrodynamics and Dynamical Systems. The response from the Physics community was enthusiastic, with over 200 participants and around 80 speakers, from all over the world: USA, Canada, Mexico, Germany, France, Holland, United Kingdom, Switzerland, Spain, and Hungary. The main aim of the conference is to provide a scenario to Mexican researchers on the topics of Mathematical and Experimental Physics in order to keep them in contact with work going on in other parts of the world and at the same time to motivate and support the young and mid career researchers from our country. To achieve this goal, we decided to the most distinguished experts in the subjects of the invite as lecturers conference and to give the opportunity to young scientist to communicate the results of their work. The plan is to celebrate this international endeavor every three years.

From reader reviews:

Shirley Kistner:

The book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems can give more knowledge and information about everything you want. Why must we leave the best thing like a book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems? A few of you have a different opinion about reserve. But one aim in which book can give many details for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or details that you take for that, you may give for each other; you could share all of these. Book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems has simple shape however you know: it has great and massive function for you. You can search the enormous world by start and read a guide. So it is very wonderful.

Cynthia Medina:

This book untitled Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems to be one of several books that best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit in it. You will easily to buy this specific book in the book store or you can order it by using online. The publisher on this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Cell phone. So there is no reason for your requirements to past this book from your list.

Rosemary Till:

Do you like reading a publication? Confuse to looking for your best book? Or your book seemed to be rare? Why so many concern for the book? But any people feel that they enjoy intended for reading. Some people likes looking at, not only science book but in addition novel and Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems or maybe others sources were given know-how for you. After you know how the great a book, you feel desire to read more and more. Science e-book was created for teacher or perhaps students especially. Those ebooks are helping them to include their knowledge. In other case, beside science e-book, any other book likes Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems to make your spare time more colorful. Many types of book like this.

William Vong:

Many people said that they feel bored stiff when they reading a book. They are directly felt that when they get a half areas of the book. You can choose often the book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems to make your current reading is interesting. Your own personal skill of reading expertise is developing when you just like reading. Try to choose very simple book to make you enjoy to study it and mingle the feeling about book and studying

especially. It is to be initially opinion for you to like to open up a book and learn it. Beside that the e-book Developments in Mathematical and Experimental Physics: Volume C: Hydrodynamics and Dynamical Systems can to be your friend when you're sense alone and confuse using what must you're doing of the time.
