Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series)

Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series)

Dynamic Food Webs challenges us to rethink what factors may determine ecological and evolutionary pathways of food web development. It touches upon the intriguing idea that trophic interactions drive patterns and dynamics at different levels of biological organization: dynamics in species composition, dynamics in population life-history parameters and abundances, and dynamics in individual growth, size and behavior. These dynamics are shown to be strongly interrelated governing food web structure and stability and the role of populations and communities play in ecosystem functioning.

Dyanmic Food Webs not only offers over 100 illustrations, but also contains 8 riveting sections devoted to an understanding of how to manage the effects of environmental change, the protection of biological diversity and the sustainable use of natural resources.

Dyanmic Food Webs is a volume in the *Theoretical Ecology* series.

- * Relates dynamics on different levels of biological organization: individuals, populations, and communities
- * Deals with empirical and theoretical approaches
- * Discusses the role of community food webs in ecosystem functioning
- * Proposes methods to assess the effects of environmental change on the structure of biological communities and ecosystem functioning
- * Offers an analyses of the relationship between complexity and stability in food webs

From reader reviews:

Paul Kline:

What do you think about book? It is just for students since they are still students or the item for all people in the world, the particular best subject for that? Merely you can be answered for that query above. Every person has distinct personality and hobby for every other. Don't to be obligated someone or something that they don't desire do that. You must know how great and important the book Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series). All type of book can you see on many resources. You can look for the internet solutions or other social media.

Theresa Adams:

The actual book Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series) will bring you to the new experience of reading the book. The author style to clarify the idea is very unique. If you try to find new book you just read, this book very appropriate to you. The book Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series) is much recommended to you to see. You can also get the e-book from the official web site, so you can more easily to read the book.

Roger Everman:

Spent a free time and energy to be fun activity to perform! A lot of people spent their sparetime with their family, or their very own friends. Usually they carrying out activity like watching television, about to beach, or picnic inside park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book can be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to test look for book, may be the guide untitled Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series) can be very good book to read. May be it is usually best activity to you.

Carolyn Cook:

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you also know that little person like reading or as reading become their hobby. You have to know that reading is very important as well as book as to be the point. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You find good news or update about something by book. Numerous books that can you decide to try be your object. One of them is Dynamic Food Webs: Multispecies Assemblages, Ecosystem Development and Environmental Change (Theoretical Ecology Series).
